COMP 433: Term Project

PHASE 2: Requirements Engineering (Elicitation & Discovery)

Revision 1

Due on April 7, 2021 at 2:00 PM

60 Points (15% Overall)

1 Phase 2: Requirements Engineering (Elicitation & Discovery)

This phase is split into only one task as follows.

1.1 Task 1: Business Context and Overview (50 points)

Category: *Team Task*

In phase 1, your team were approved to work on a specific business. In this task, your team must think as the business owner with a business mindset to understand the business services, functions, users (or stakeholders), and the environment/circumstances that it will be used and eventually deployed in. To reach full understanding of the business, you are required to conduct a search of a similar business available online.

1.2 Phase 2 Deliverable

For submission, each team should fill proper sections corresponding to the given tasks in the shared template for *Software Requirements Specification* document. Each **team leader** is required to submit a modified version of the template as follows:

1. A single PDF file named **TeamName-SRS-Phase2.pdf**

2. Updated cover page with proper details about the project and team.

3. Updated revision history for proper revision tracking.

4. Updated Section 1 (Introduction) and Section 2 (Overall Description) based on conducted research in **Task 1**.
